SPORTIME UltraHoops™

Structural Strength Of Floor Hockey Shafts

In order to make UltraHoops one of the world's strongest no-kink PE hoops, we started with the world's best hoop-shaft extrusion, a deep, fat-walled oval profile with thick walls and dual internal support struts. With DOM's permission we made a structurally identical shaft that we then sonically welded into perfectly round, virtually indestructible, 24", 30" and 36" diameter hoops. UltraHoops are sold in 6-color sets. Latex free. Visit our website to view the online video.

One Kit Per Kid

Separate hands-on materials into plastic storage containers or use individual kits, like the math kits below, for students to explore concepts. Kits can be numbered or labeled by student name for use at school or home. Don't forget to build in a cleaning routine to make sure materials are sanitized as well.

Individual Learning Math Kits

Complete with over 60 math tasks, individual sets of age-appropriate math items provide hours of math instruction. Suitable for additional teaching lessons or a return to individual Student learning. Supports a potential hybrid learning model of math instruction for a return to school. Packaged in a reusable bag, these individual student learning kits reinforce a sanitary, no sharing policy to help minimize the potential risk of virus transmission.

ZKTeco Speedface+ Series

SpeedFace + is a series of high performance face, palm and fingerprint recognition readers that additionally detect body temperature and the presence of a protective mask worn by both registered and unregistered users.

The SpeedFace + embedded face & palm recognition sensor provides 100% touchless user authentication for various applications including Access Control, Time & Attendance, Visitor Management, Event Management, and more.

Model SF1008+ can store and match up to 50,000 faces in less than 0.3 seconds while operating in both total darkness and bright sunlight (up to 50,000 Lux).

In addition to providing face, palm, and fingerprint user authentication, SpeedFace+ can detect body temperature and the presence of a protective mask being worn by both registered and unregistered users. Users can be denied door access if a user-defined unacceptable body temperature or if no mask is detected. The ability to quickly & accurately detect body-temperature and the presence of a mask is becoming increasingly important for airports, schools, commercial office buildings, and other public meeting areas. People identified having unacceptable body-temperature and their supervisors can then take appropriate action. SpeedFace+ combines a powerful embedded thermal camera and ZKTeco's latest face, palm, and fingerprint recognition algorithms that are supported by an optimized dual-core processor. SpeedFace+ is unmatched in accuracy, matchingspeed, and versatility. It provides advanced security and convenience, all on a single affordable device.
